

Mapping Millions Optimising Miles

The **New Route** to Sales Force Productivity

One of the world's largest CPG manufacturers producing carbonated soft drinks and distributing via a global bottling network chose Bizom for their RTM project that spanned across 4 Asian markets: Vietnam, Singapore, Malaysia and Myanmar.

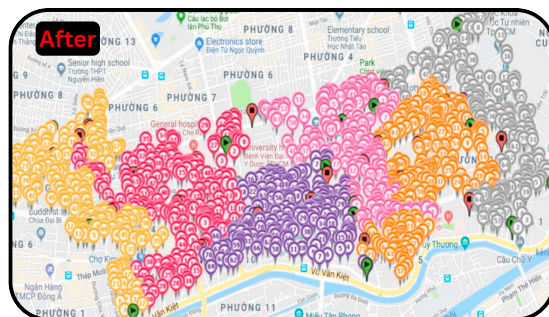

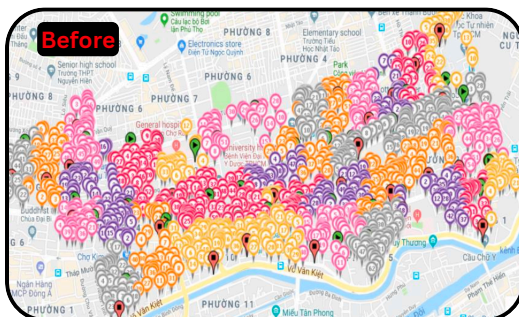

The Challenge

-  Big Gap in Coverage vs Universe
-  High Cost to Serve
-  High Field Time Variability
-  Territorial Inefficiencies
-  Reduced Store Engagement

The Solution

Bizom's Beat Optimisation was rolled out and;

-  Geography wise logic configurations with weekly beat plans for 8 different frequency models
-  Embedded directly into client's calendar and existing ecosystem via REST APIs and custom connectors.

Avg Outlet
Coverage Per Beat
increased by
10%

Optimised number
of salesman
required by
10%

Road Distance
Travelled
reduced by
35%

Variations in
Outlet per beat
reduced by
40%

Why It Worked?

- **High Configurability:** Country-specific frequencies and logic
- **Powerful Optimisation Engine:** Built for real-world scalability
- **Seamless Integration:** REST APIs + custom formats
- **Secure by Design:** RBAC, SSO, audit logs, and AWS-grade protection
