

When Growth Outgrew Visibility

A leading Indian health & personal care company replaced fragmented, manual field reporting with **Real Intelligence** execution and turned coverage into compounding growth.

121% YoY growth
in uniquely billed outlets, meaning deeper
market penetration, not just wider reach.

Before

- Field visits logged by hand, in spreadsheets
- No way to tell a productive call from a wasted one
- Coverage targets set, with no feedback from the field

With Bizom

- Every visit captured automatically, in real time
- RI agents drew timely insights, tasks, and recommendations
- Coverage, quality, and sales linked in one loop

31%
